RESEARCH INTERESTS	Model Interpretability / AGI Preparedness / Deep Learning AI Safety, Self-Supervised Learning & Mechanistic Interpretability	
EDUCATION	Bob Jones University, South Carolina, USA B.S. in Computer Science Aug. 2023 – May. 2027 (expected)	
EXPERIENCES	Bob Jones University - Software Developer	Feb. 2026 – Present
	• Writing code and maintaining Django web applications for over two thousand students	
	Lovable, USA - Campus Leader	Jan. 2026 – Present
	• Part of the first ever Lovable campus leader cohort	
	Research Assistant	Dec. 2025 – Present
	• Predictive deep learning models for accelerating material research • Supervisor: Sumanth Kandavalli (NYU Tandon School of Engineering)	
	Bob Jones University - Teaching Assistant	July. 2025 – Aug. 2025
	• Mentored high-school students in teaching about Arduino principles and programming. • Supervisor: Dr. Timothy Anglea	
PROJECTS	Machine Learning • Implementation of ML algorithms from scratch (coming soon) Algorithms & Math • A brief overview of Laguerre's method for finding roots in polynomials • A brief overview of Multi-dimensional Runge-Kutta stability Misc. • Perspective of AI in college • Implementation of fast-gradient sign method exposing hidden flaws in computer vision • Lead for electronics team, stratospheric weather balloon payload and tracking system	
AWARDS AND HONORS	Lovable Campus Leader 2026	Jan. 2026
	• Selected to represent one of the fastest growing startups in history	
	Dean's List	2023 – 2024
	• Recognition of exceptional academic achievement
